

# **Eastham Digitized Vital Records Birth Records Index 1650 to 1906**

## **Introduction**

Names are indexed to Eastham birth records found in eight of the PDF files in the Eastham digitized records.

For index purposes, the eight PDF files have been assigned letters. These are the same letters used in the marriage and death indexes.

- A. Births, Marriages, Deaths 1649 – 1755
- B. Births, Marriages, Deaths 1654 – 1797
- C. Births, Marriages, Deaths 1701 – 1781
- D. Births, Marriages, Deaths 1717 – 1886
- E. Births, Marriages, Deaths 1744 – 1848
- F. Births, Marriages, Deaths 1836 – 1907
- G. Births, Deaths c 1800's
- K. Marriage Intentions & Births c1700's

Some PDF file pages containing birth records also include family marriage and death records.

## **Birth Records Index Divided Into Five Sections**

Each section has a separate names index. The five sections are:

- Birth Records Index up to 1720  
(Index up to 1720 also contains Mayflower Descendent References)
- Birth Records Index 1721 to 1760
- Birth Records Index 1761 to 1800
- Birth Records Index 1801 to 1850
- Birth Records Index 1851 to 1906

These indexes include about 5,800 births and about 9,600 page references.

## **Dates**

Some early records show a double date such as 1714/5. The year is reported based on both the old style Julian calendar and the new style Gregorian calendar. In this index only the new style year is shown.

## **Page Numbers**

Please note the pages in the Index are the PDF File pages and not the page numbers written on the records.

## **Confirm the Index Information By Inspecting the PDF Pages**

Some names and years are best estimates because many of the digitized record pages are difficult to read. It is important to confirm the index information by inspecting the referenced PDF file pages. The actual pages also may reveal additional useful family information.
